Victor Lucas Gomes da Silva

FULL-STACK WEB DEVELOPER

Belém, Pará, Brazil | +55 91 98411-3181 | Victorlucas2301@proton.me | LinkedIn | github.com/Victor-Viicell

SUMMARY

Full-stack web developer and Computer Science student with experience building CIAP WEB, a Next.js, React, and Supabase case-management system for 16 members of a Pará Military Police care unit, and delivering a cross-platform Tauri and React AI application. Served as senior technical reference for a four-person team.

TECHNICAL SKILLS

Programming languages: TypeScript, JavaScript, PHP, Java, Python, HTML5, CSS3

Frameworks & libraries: React, Next.js, RippleJS, Tauri 2.0, Material UI, shadcn/ui, PixiJS

Backend & data: Node.js, REST API design, Supabase (Postgres, auth, real-time), Row-Level Security, Zod, Stripe webhooks, OpenAI API, LLM APIs, MySQL, MongoDB

Tooling: Lexical, Git, GitHub, GitHub Actions

Coursework: Remix, React Native, Expo, UML modeling, object-oriented design

Other: accessibility (ARIA), Photoshop, hardware & mobile repair, cloud fundamentals, AI-native development

LANGUAGES

Portuguese (native)

English (fluent; Business English training)

EXPERIENCE

Pará Military Police (PMPA) — Feb 2025 – Sep 2025

Web Developer, CIAP WEB (Civil Volunteer) · Belém, PA, Brazil

- Built and maintained CIAP WEB, a Next.js and React case-management system used by 16 CIAP members (6 volunteers and 10 psychology and social-assistance officers) to support PMPA personnel.
- Designed and implemented REST endpoints, modeled data and authentication in Supabase with row-level security, validated forms and API payloads with Zod schemas, and developed the interface with Material UI.
- Served as the senior technical reference for a four-person development team, mentoring newer members on implementation and troubleshooting.
- Organized sensitive case information for a multidisciplinary care team, keeping records accurate and confidential as the unit's demands changed.

PROJECTS

AI Roleplay App — 2025 – present

Web, mobile & desktop · Tauri, React, RippleJS, Supabase, Zod, Lexical, Stripe, OpenAI, PixiJS

- Built a cross-platform AI roleplay app from a single React codebase for web, mobile, and desktop with Tauri, using Supabase for authentication, storage, and real-time data.
- Integrated an OpenAI-compatible dialogue engine and Stripe webhook billing, validating model output and webhook payloads with Zod while building the rich-text editor with Lexical.
- Rendered branching conversation history as an interactive tree with PixiJS, creating a visual interface for navigating roleplay sessions.
- Migrated the component layer from React with shadcn/ui to RippleJS.

Bilingual Resume Website — 2026

HTML, CSS, GitHub Pages

- Built a bilingual resume site with semantic HTML, accessible ARIA markup, and a print stylesheet that produces A4 PDFs, and automated deployment to GitHub Pages with GitHub Actions.

EDUCATION

Faculdade Ideal Wyden — Mar 2023 – 2028

B.Sc., Computer Science (in progress) · Belém, PA, Brazil

- Relevant coursework: object-oriented programming in Java, UML systems modeling, Python, and web development in HTML5, CSS, JavaScript, and PHP.

CERTIFICATIONS

Internet Programming Certification, Faculdade Ideal Wyden (240 h): HTML5, CSS, JavaScript, PHP, Python. 2024

Information Systems Programming Certification, Faculdade Ideal Wyden (240 h): Java (OOP), UML modeling. 2025

Professional IT Training, Cedaspy (480 h): web development, design, Photoshop, hardware, cloud computing. 2020

Mobile & tablet repair to board level, Tellemak (45 h).

ACHIEVEMENTS

- **Finalist, V Prêmio Inova Servidor 2025** (Processes): CIAP WEB team · Escola de Governança Pública do Estado do Pará (EGPA).
