SUMMARY

Computer Science student and web developer with hands-on experience building and maintaining a Next.js, React, and Supabase case-management system used by 16 CIAP members at the Pará Military Police. Built a cross-platform Tauri and React application, and served as senior technical reference for a 4-person team, mentoring newer developers while managing sensitive records for a multidisciplinary care unit. Seeking a full-stack web development or software engineering role.

TECHNICAL SKILLS

Languages: JavaScript, PHP, Java, Python, HTML5, CSS3

Frameworks & libraries: React, Next.js, RippleJS, Tauri 2.0, Material UI, shadcn/ui, PixiJS

Backend & data: Supabase (Postgres, auth, real-time), Zod, Stripe webhooks, OpenAI API

Tooling: Lexical, Git, GitHub

Coursework exposure: Remix, React Native, Expo, UML modeling, object-oriented design

Other: accessibility (ARIA), Photoshop, hardware & mobile repair, cloud fundamentals

Languages spoken: Portuguese (native), English (fluent; Business English training)

EXPERIENCE

Web Developer — CIAP WEB (Civil Volunteer)

Feb 2025 – Sep 2025

Pará Military Police (PMPA) · Belém, PA, Brazil

- Built and maintained CIAP WEB, a Next.js and React case-management system used by 16 CIAP members — 6 volunteers and 10 psychology and social-assistance officers — to support PMPA personnel.
- Modeled data and authentication on Supabase, enforced form and API validation with Zod schemas, and built the interface with Material UI.
- Acted as senior technical reference for a 4-person development team, mentoring newer members on implementation and troubleshooting.
- Managed and organized sensitive case information for a multidisciplinary care team, maintaining accuracy and confidentiality while adapting to shifting demands.

PROJECTS

AI Roleplay App — Web, Mobile & Desktop

2025 – present

Tauri, React, RippleJS, Supabase, Zod, Lexical, Stripe, OpenAI, PixiJS

- Architected a cross-platform AI roleplay app from one codebase — web, mobile, and desktop via Tauri — with auth, storage, and real-time data on Supabase.
- Integrated an OpenAI dialogue engine and Stripe webhook billing, validating model output and webhook payloads with Zod; built the rich-text editor on Lexical.
- Rendered branching conversation history as an interactive visual tree with PixiJS.
- Migrated the interface from React with shadcn/ui to RippleJS, rewriting the component layer.

Bilingual Resume Website

2026

HTML, CSS, GitHub Pages · semantic markup, ARIA, print stylesheet generating A4 PDFs

EDUCATION

B.Sc. in Computer Science (in progress)

Mar 2023 – expected 2028

Faculdade Ideal Wyden · Belém, PA, Brazil

- Relevant coursework: object-oriented programming in Java, UML systems modeling, Python, and web development in HTML5, CSS, JavaScript, and PHP.

AWARDS & CERTIFICATIONS

- **Finalist, V Prêmio Inova Servidor 2025** (Processes) — CIAP WEB team · Escola de Governança Pública do Estado do Pará (EGPA).
- **Internet Programming Certification** — Faculdade Ideal Wyden, Jun 2024 (240 h): HTML5, CSS, JavaScript, PHP, Python. Verify
- **Information Systems Programming Certification** — Faculdade Ideal Wyden, Dec 2025 (240 h): Java (OOP), UML modeling. Verify
- **Professional IT Training** — Cedaspy, 2020 (480 h): web development, graphic design, Photoshop, hardware maintenance, cloud computing.
- **Additional training** — Business English, Quality Plus (2019); mobile & tablet repair to board level, Tellemak (45 h).
